

RAYS CHAIR

FRANKOF

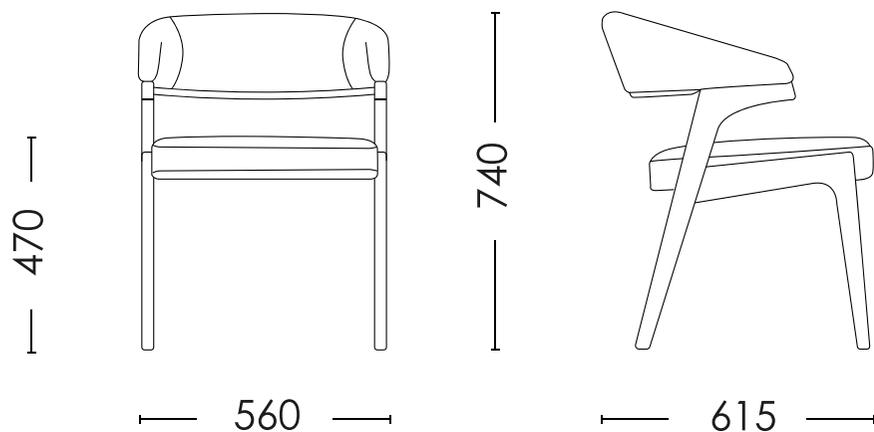

The Rais chair features a modern, elegant design that highlights the refined combination of solid wood and soft upholstery. This model fits seamlessly into home interiors — such as living rooms or dining areas — as well as commercial spaces, including restaurants, cafés, or contemporary conference halls.

FRANKOF

The construction of the model is carefully designed down to the smallest detail, ensuring that it not only looks stylish but also provides maximum comfort in use. Its silhouette is distinguished by smooth lines and balanced geometry, where every curve is thoughtfully shaped to create a harmonious overall form.

SCHEME AND DIMENSIONS

The base of the chair is a sturdy wooden frame made of premium solid oak. The seat combines pine beams, springs snake, elastic webbing, polyurethane foam, and synthetic padding. This layered filling provides lasting resilience and comfort that will serve for years. Polyurethane foam is also used in the backrest.

RAYS

CHAIR

The legs are slightly angled and tapered towards the bottom, adding both stability and a sense of visual lightness. The low, semi-circular backrest gently follows the body's natural anatomy. Its upper section smoothly transitions into compact armrests that add extra comfort while keeping the silhouette compact.
