A Return to Classic Design in a Modern Interpretation – Midway Classic bed.

The standout feature of this model is its headboard, **decorated with button-tufting or the “capitone” technique.** This detailing gives the bed an elegant, classic appearance, creating a deep, **textured effect with a distinctive pattern.**

# MIDWAY Classic

The bed base is **minimalistic**, keeping the bedroom space uncluttered. Slim, rounded side rails are complemented by **tall metal legs** (200 mm). This combination creates a sense of visual lightness, highlighting the refined silhouette of the Midway Classic bed. Additionally, the legs allow easy cleaning under the bed with a robotic vacuum.

For enhanced sleeping ergonomics, the base includes beech slats. **They provide orthopedic support and evenly distribute weight.**

The bed frame is made of 80% plywood, **a material that withstands active use over a long period without losing its original properties.**

The construction also includes softwood beams, HDF-MDF, and E1 particleboard. **The softness of the headboard and side rails** is achieved with high-density polyurethane foam.

## SCHEME

Thanks to its simple form, despite its classic elements, the Midway Classic bed perfectly complements modern interiors in neo-classical, minimalist, or Scandinavian styles.
